PRODUCTS

Mash Kettle	Whirlpool
Wort Kettle	Bright Beer Tank
Lauter Tun	Fermentors
Hot Liquid Tank	CIP System
Cold Liquid Tank	Filter Housings
Process Automation	Process Piping
Utility Piping	Glycol Piping
Filtration Systems	Pressure Vessels
	Heat Exchangers

We are Specialized

Process Design

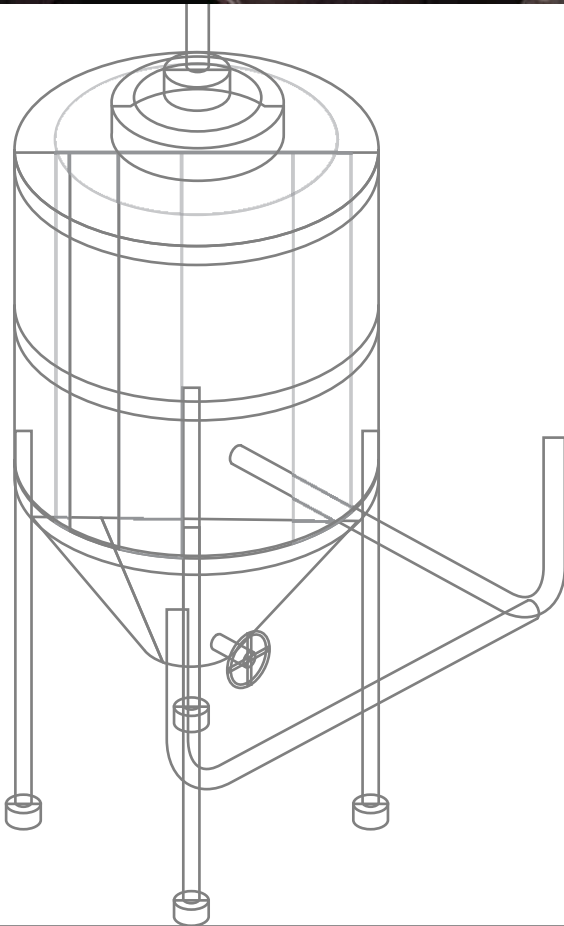

We specialize in designing and manufacturing process equipment according to customer requirements. Our constant R&D to improve existing designs while developing new technology for process applications have helped us achieve the industrial edge.

Our USPs

- Custom Designs
- Assured Quality
- Concept to Execution
- CAD Drawing, 3D Visualisation
- Precision Engineering
- 100% Customer Satisfaction

Manufacturing & Testing

ALFA AROOMA (I) PVT LTD

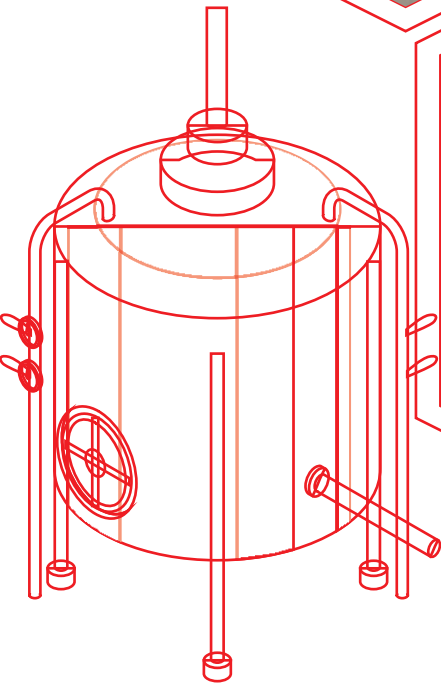

All equipment will be manufactured and tested at our factory in Bangalore, India meeting the highest quality standards

Our quality control starts from the incoming materials till the finished equipment. Stage inspections are done during the manufacturing process. All welding done by our qualified and skilled welders are subjected to tests like visual inspection, die penetrant test, radiography etc., All pressure vessels are pressure tested with air, water and steam as per standards.

A factory acceptance test (FAT) will be done along with our customers before the equipment's are dispatched from our factory. Post site installation a site acceptance test (SAT) will be carried out before handing over the equipment's to the customer. Our onsite support and maintenance will continue as per terms agreed upon.

Manufacturing Setup

Photos from our factory in Bangalore, India & Site Installations.

Highly skilled engineers working with automated and manual processes for highest quality output.

All our products start as bare sheets of steel and are custom made to each customer's requirements.
